SUMMARY

Full stack engineer with 5+ years building reliable web applications. Comfortable across the stack — TypeScript, React, Node.js, and PostgreSQL. Pragmatic, detail-oriented, and happiest shipping things people use.

SKILLS

Languages

Advanced

TypeScript · JavaScript · Python · SQL

Frameworks & Tools

Advanced

React · Node.js · PostgreSQL · Docker

WORK EXPERIENCE

Senior Software Engineer at Northstar Labs

Jun 2021 - Current

Senior engineer on the core web platform team.

- Led the rebuild of the customer dashboard, cutting page load time by 45%
- Designed and shipped a REST API now serving 2M+ requests per day
- Mentored three junior engineers through code review and pairing

Software Engineer at Brightwave

Jul 2018 - Jun 2021

Full stack engineer across frontend and backend.

- Built a reusable React component library adopted across four product teams
- Migrated legacy services to PostgreSQL, improving query latency by 30%
- Automated CI/CD pipelines, reducing release time from hours to minutes

EDUCATION

Bachelor Computer Science at University of California, Berkeley

Sept 2014 - May 2018
